

INDUSTRIAL EQUIPMENT

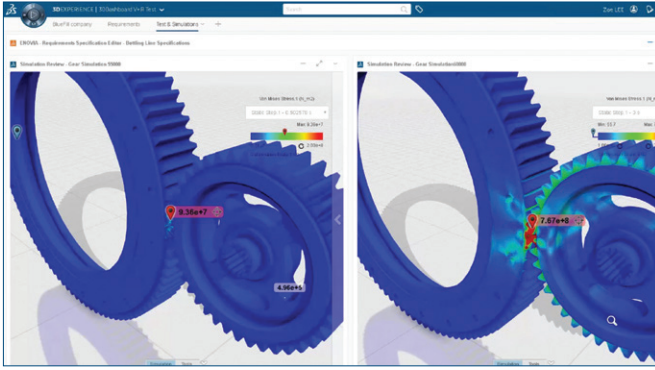

An aerial, top-down view of a complex industrial manufacturing facility. The machinery is primarily white and blue, with some orange accents. It features several large circular components, possibly rotors or spindles, and various conveyor belts and structural elements. The floor is dark grey. The text is overlaid in the upper left quadrant of this image.

DIGITAL EQUIPMENT CONTINUITY ONE UNIQUE SOLUTION TO ENGINEER, PRODUCE AND SERVICE FAST ANYWHERE

LEVELING THE PLAYING FIELD FOR SMALL TO MEDIUM BUSINESSES

New technologies perpetuate incredible new processes and systems to advance how manufacturers make products and deliver services. But for small to medium companies, adopting new technology can seem overwhelming and cost prohibitive.

From product engineering to manufacturing to service and maintenance, Digital Equipment Continuity provides the accelerated freedom to collaborate, design and produce at an accelerated rate at any location. This solution helps perpetuate incredible opportunities, new processes and systems to advance how manufacturers make products and deliver services.

GET BETTER PRODUCTS TO MARKET FASTER

Industrial Equipment companies need to produce smarter and faster with connected plants, machines, people and customers. To do this, they must efficiently plan and manage all aspects from engineering to execution while ensuring consistent high production performance in a globally distributed organization.

One source of truth provides advanced collaboration and improved productivity that shortens development cycle time and reduces past design mistakes through design compliance with corporate standards.

COST-EFFECTIVE PRODUCTION

To be competitive, you must deliver what the customer wants in a timely fashion. To be profitable, you need to do it efficiently while ensuring what the customer ordered is exactly what they receive.

Digital continuity is the backbone of the **3DEXPERIENCE®** platform and provides the capability to deliver products based upon performance, time and cost standards with improved traceability.

HIGHER PRODUCT QUALITY, BETTER AGILITY

Producing cutting-edge products means you need accurate insight into emerging market trends from all over the world. It also requires project management and traceability of customer requirements throughout the complete product lifecycle.

Immersive business intelligence provides instant access to real-time information which speeds up smart decision making and improves communication. It also allows you to create, share Ideas and bring them to life quickly and efficiently based on what the market demands.

ENRICHED COLLABORATION

For designers and engineers, it's difficult to create an entire product and plan for manufacturing execution when data is stored in multiple locations.

In an immersive environment, you can efficiently leverage skills and knowledge in a unified ecosystem with access to all required information at anytime, anywhere. Designers can seamlessly collaborate to develop complex products in a collaborative multi-discipline environment and eliminate traditional CAD & PDM integration limitations.

KEY BENEFITS

- Data-driven collaboration and project management
- Reduced time-to-market
- Change and configuration management
- Multi-discipline engineering
- Traceability and requirement validation

Digital Equipment Continuity is available On Premise and On Cloud, both providing the ease of use and power of the **3DEXPERIENCE** platform.

Our **3DEXPERIENCE®** platform powers our brand applications, serving 12 industries, and provides a rich portfolio of industry solution experiences.

Dassault Systèmes, the **3DEXPERIENCE®** Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 220,000 customers of all sizes in all industries in more than 140 countries. For more information, visit www.3ds.com.
